SUMMARY

I'm Hafizh, a dedicated 6th-semester student in Electronics Engineering Technology (D-4) at POLINES with a current GPA of 3.4. I bring a solid foundation in control systems, automation, and electronic engineering. Highly interested in Programmable Logic Controllers, industrial automation systems, instrumentation, and IoT. Proven leadership and teamwork skills through roles as Head of the Reasoning Division of the Electronics Engineering Student Association. Highly motivated to expand my expertise in automation and smart technologies, I am prepared to contribute to research, development, and implementation projects involving industrial control, instrumentation, and IoT-based solutions.

EXPERIENCE

Internship as Research and Development 07/2022 - 12/2022
Sarana Cipta Media

Researched and developed a 4-axis robotic arm for object handling applications, encompassing the design and fabrication of the robotic structure through 3D printing technology, as well as the integration and control of servo motor actuators across all axes to ensure accurate positioning and operational performance.

EDUCATION

Electronics Engineering 08/2023 - 07/2027
Politeknik Negeri Semarang - Diploma 4

Natural Sciences 07/2021 - 07/2023
Senior High School, MAN 2 Bekasi

CERTIFICATES

CV. Sarana Cipta Media 03/2026

SKILLS

English	Intermediate	3D Design & Printing (Inventor)	Intermediate
		Internet of Things (IoT)	Intermediate
Microsoft Office	Advance	Programmable Logic Controllers	Intermediate
C/C++ Program	Intermediate
